BLOODPRINT

A guitar is supposed to be just a tool that, with the help of its properties and unique attributes, passes the emotional expression of the great guitar player to the ears of his listeners. And yet the emotions are appearing and forming in your body and it is not possible to put strings directly onto yourself and cut out the middleman. But what became possible is to put a spirit of your body into the guitar. It is pure majestic alchemy, after which the material portrait of the great guitar player is the guitar itself with his personality and emotions already harvested in it.

It's tuned up and in perfect sync with its owner. Embrace it and express yourself just the way you feel, because you and the guitar are one and the same. The DNA of the wood from which the guitar is made is as alive as your flesh and bone. With unique EZO artistic approach, they join each other and a part of your spirit is revitalizing the wood, shaping it the way you are and giving it new, fresh life. It starts to breathe, feel and behave in perfect unison with you.

And even when the time comes for you to leave this world behind, your Bloodprint guitar remains and, by all means, truly...
...the Legend never dies!

© BLOODPRINT

of Ruben Papian

*"Just feel the difference...
I have an art masterpiece guitar and
I AM, an art masterpiece guitar!"*

This is the one and only Bloodprint guitar ever crafted with bloodprint of Ruben Papian himself. It is as mysterious as the one who created it and gave it life. Entire guitar is made out of Ezofied ebony.

Ⓜ BLOODPRINT

Ice Age

*"Frozen body. Icy pulse.
Ripped from the cold heart of the ancient glacials.
My DNA changed the face of the planet. Shivering vibrations..."*

Thawed from the icy block that belongs to much harsher times, Ice Age brings it's cold aura to modern times. Razor sharp and heavy, this guitar is both Sabertooth tiger and Woolly Mammoth.

Ⓜ BLOODPRINT

URAN

*"...Remains eternaly youthful and untethered. Icy giant, bohemian.
Absolutely rebellious. God of the deep blue sky.
He lives for freedom and creativity..."*

This Bloodprint guitar is made of ezo mahogany/maple merged with DNA of Mr. Maylian. "Uran" is the best sound match with the biology of its owner.
